

Professional SIM adapter

The professional SIM adapter is a great solution for temporarily converting a SIM-sized card to a full size one, allowing it to be used with a standard smartcard reader. The adapter has the same kind of locking connector as a mobile phone, linked via PCB tracks to solder-plated pads which come into contact with the reader. This adapter is a simple solution for regular SIM phonebook editing or for management of SIM-sized cards used for PC logon and security applications.

Extremely durable solution to convert a SIM-sized card to a full size one. Ideal for regular desktop use.
