

AT88SC25616C M2 secure memory smartcard - 32K

The AT88SC25616C M2 from Atmel is a 32K high performance memory card incorporating built-in security and cryptographic features. The CryptoMemory family of cards features a set of user memory zones that enable the individual setting of different security access rights. In addition, the built-in tamper-protection circuits provide an attack-proof, secure place for sensitive data storage.

The AT88SC25616C M2 card features an embedded cryptographic engine that enables dynamic mutual authentication between card and host.

Plain white card.

If you need this card in a SIM-size just add our FREE SIM cutting service to your basket alongside this card.

A high performance memory card with integrated security and cryptographic features. 32K memory.
