

EasyTac USB flash memory stick - 8GB

EasyTac USB stick is a removable storage device that has been designed for backing-up and transferring digital tachograph data. The device behaves as a standard USB flash memory drive with 8GB of available storage, and can therefore be used for general storage of data as well as digital tachograph files downloaded by EasyTac downloader.

When used with EasyTac software (version V2.5 or later) the EasyTac USB stick is recognised when inserted, and can trigger an automatic back-up or transfer of your downloaded files.

The EasyTac USB stick can be easily attached to a keyring by the loop on the end, and has space to hold several years' worth of tachograph data, depending on usage.

A 8GB USB storage device for backing-up and transferring digital tachograph data. Works automatically in conjunction with EasyTac software.
