EasyTac downloader (UK) software only

Easy access to your digital tachograph data

This EasyTac downloader package is designed to assist transport operators in meeting the essential requirements of digital tachograph legislation - namely to periodically download, view and store drivers' card activity data and to archive and check vehicle unit data for their fleet. This software only package is ideal for those with existing hardware.

This package contains:

EasyTac downloader - PC software for viewing, checking and printing driver and vehicle data

EasyTac memory stick - contains the software and can be used to backup and transfer digital tachograph data

Software Features:

Easy to use with a simple user interface

View, analyse and print both driver and vehicle activity reports

Automatic visual reminders for when to download

Create familiar analogue-style tachograph timelines

Manage and forward your stored data via email

Highlights overspeeds, events and faults

Back-up and export your data

Supports an unlimited number of drivers and vehicles

Compatible with:

All second generation (Gen2/Annex 1C) smart tachographs and drivers cards

Windows PCs running Windows 7, 8, 10 or 11

All common smartcard readers

All common vehicle unit (VU) download devices - including Digidown, Optac and VDO

All makes of digital tachographs used within Europe

This package provides you with a low-cost, convenient solution for managing your data with **no on-going charges**.

UK edition. Compatible with all first and second generation tachographs.

EasyTac downloader is simple to use...

Simply insert your driver's card into the reader, and click 'Download Card'. Data is then read and stored in tamper-proof files that conform to the European standards as required by VOSA. These data files can be saved on the PC itself or to your network.

Once your data is downloaded, you can view and print flexible reports of the downloaded data, including detailed activities and daily summaries. Vehicle unit (VU) data can also be downloaded from appropriate download devices.

EasyTac downloader enables you to...

- Meet the minimum legal requirements for downloading digital tachograph data.

  EasyTac downloader reads data from drivers' smartcards and stores it in the standard file format required under UK and EU law. You simply need to ensure that you download data from each driver's card once every 3-4 weeks. The software also aids downloading from vehicle unit (VU) download devices.

- View, analyse and print activity reports.

  After the download process, you can use the reporting functions to identify the dates where activity data has been read, and display and/or print the detailed activity data as well as a daily summary of the hours spent on each shift.

- Print analogue-style tachograph timelines and export your data.

  A printed timeline report includes daily graphical representations for the driver activities. You can also export report data into other programs.

- Manage, back-up and forward your stored data.

  Files are automatically stored in a configurable location using a simple-to-understand file naming convention. You can change this location so that it is on either a local disk drive or a network. The files are also freely accessible in case they need to be forwarded by email. A feature to back these files up is also included.

- Re-analyse previous downloads.

  Files previously stored by EasyTac downloader can be re-opened at any time for further analysis and reporting. Standard-format files downloaded by other software applications can also be imported and analysed if required.

EasyTac downloader is licensed on a per-PC basis - simply buy one package per download station as needed.

Compatibility

EasyTac downloader is designed to work with all contact smartcard readers that comply with industry-standard PC/SC specifications. Please ensure your reader meets this minimum requirement.

All Smartcard Focus solution packages include readers that meet this specification, as well as meeting other minimum standards that are set for quality, technical support and driver maintenance.

Popular readers that have been tested with EasyTac downloader include the Identiv 2700R and Omnikey 3121, as well as most other USB contact smartcard readers stocked by Smartcard Focus. EasyTac downloader is compatible with all makes and models of digital tachograph and driver's card used in Europe, including the latest Smart 2 tachographs and cards introduced starting in 2023 (also known as Gen2.2).
