

Gemalto IDPrime MD 830 B + EM4200 + MIFARE 1K

The Gemalto IDPrime MD 830 B card is a plug & play PKI smartcard that provides the necessary security services to implement a strong two-factor logical access and security infrastructure on Windows and other platforms. The IDPrime MD 830 B is a contact interface smart card that supports the ISO 7816 standard, and is FIPS 140-2 Level 3 certified.

Fully compliant with the latest Microsoft minidriver specifications for use on Windows, without the need for additional middleware.

This version includes a built-in low frequency EM4200 RFID chip, and a high frequency (13.56MHz) MIFARE Classic 1K chip providing a useful and flexible combination that can be used for logical and physical access control and other RFID-based applications such as time and attendance or print-release.

Plain white card. Standard pre-programmed EM4200 chip serial number. Un-encoded MIFARE Classic chip with default keys.

Gemalto is now part of Thales.

PKI smartcard ideal for highly secure public-key based applications. Includes a built-in contactless EM4200 and MIFARE 1K chips giving the potential for the addition of physical access control applications. FIPS 140-2 Level 3 approved.
