

Gemalto IDPrime MD 840 B + MIFARE DESFire 4K EV1

The Gemalto IDPrime MD 840 B card is a plug & play PKI smartcard that provides the necessary security services to implement a strong two-factor logical access and security infrastructure on Windows and other platforms. The IDPrime MD 840 B has a contact interface smart card chip that supports the ISO 7816 standard, and is Common Criteria EAL5+ certified. It is also SSCD certified and eIDAS compliant for secure electronic signature generation.

Fully compliant with the latest Microsoft minidriver specifications for use on Windows, without the need for additional middleware.

This hybrid version includes a built-in contactless MIFARE DESFire 4K EV1 chip, providing a useful combination that can be used for logical and physical access control and other RFID-based applications.

Plain white card. Un-encoded MIFARE DESFire chip with default keys - optional DESFire programming service and solutions also available.

Gemalto (SafeNet) part O1092156 - IDPrime MD841B DESFire 4K. Gemalto is now part of Thales.

**Multi-purpose PKI smartcard ideal for highly secure public-key based applications. Includes a built-in contactless MIFARE DESFire EV1 chip for physical access and other RFID applications. Common Criteria EAL5+ and PP SSCD certified. Gemalto part O1092156 / IDPrime MD841B**
