

SafeNet eToken FIDO authenticator

Copyright 2025 Dot Origin Ltd

The SafeNet eToken FIDO is a portable two-factor USB authenticator token that supports secure network logon in Windows10 and other FIDO2-compliant operating systems. It can support authentication and digital signing, as well as secure remote access to VPNs, portals and cloud services. The token requires no special reader or training to use. The token can be developed, by the addition of Java applets, to support other security applications.

These FIDO2 security keys are fully compatible and integrated with Azure AD (now called Entra). They have been verified by Microsoft technical teams. The tokens are Common Criteria certified.

Thales part number 909-000208-001.

Country of origin: China

HSF Code: 8523519000

SafeNet eToken FIDO portable authenticator. Mini format white case and Microsoft-Azure accreditation. Thales part number 909-000208-001
