

Sun Ray Card

This Sun Ray smartcard is a low-cost solution for use with Sun's range of thin client devices, supporting features such as smartcard-based identity and hot desk mobility. The standard Sun Ray Server software supports a wide range of smartcards but most of these are expensive or difficult to obtain. Working directly with Sun we have designed this card as an easy alternative that can be purchased in any quantity and printed using any standard smartcard printer.

The relevant card script file may already be present on your Sun Ray Server or can otherwise be simply installed by following the instructions provided.

This card offers excellent value to SunRay users and is one of the most competitive on the market.

If you need this card in a SIM-size just add our FREE SIM cutting service to your basket alongside this card.

Low-cost user ID card for use with Sun's range of thin client devices.
